Vermont Veterinary

By signing below, I acknowledge that I am the owner of the animal described above. I have been informed that this animal is temporarily exempt from rabies vaccination. I have also been informed of the following important information:

- This animal must be inoculated against rabies as soon as the medical condition permits.
- This animal is not currently vaccinated against rabies, and as a result is at an increased risk of becoming infected if exposed to a rabid animal. I should minimize the risk of the animal becoming exposed to rabies by keeping it on my premises or on a leash at all times and avoid exposure to other animals, especially wild animals.
- Exemption from rabies vaccination does not exempt the animal from other Vermont state laws related to rabies. If this animal is potentially exposed to rabies, or if the animal bites a person, public health authorities may require that the animal be quarantined and observed for signs of rabies or euthanized immediately and tested for rabies.
